## BANKING BUSINESS ENVIRONMENT IN THE FIRST SIX MONTHS 2013

### Global economy and Euro zone

In the past months, central banks have intervened deliberately and effectively with market-calming measures. There was broad recovery both last year and at the beginning of this year, while economic downturns were mainly politically induced. Market sentiment was dampened by an ungovernable Italy after the parliamentary elections in February, the rescue of ailing Cyprus and the lack of agreement in the debt dispute in the USA. Political uncertainty in Portugal at the end of the second quarter resulted in further market setbacks.

Between April and June, statements from central banks did more than just calm markets. Based on improved economic outlooks, the strengthening US real estate market and a recovery in the US labour market, rumours emerged that the Federal Reserve Bank would stop flooding the market with money and withdraw their expansionary monetary policy. Even before official verification, uncertainty and volatility led investors away from risky investments. Later, the Federal Reserve Chairman modified his statement with regard to the timing of the exit, which led to a noticeable recovery in the markets.

There was complex reaction to the economic data from China, which were weaker than expected. In the course of the second quarter it became apparent that the world's second largest economy, regardless of its allotted function as supporter of global economic growth, was clearly and uncompromisingly concentrated on the qualitative growth and the "conversion" of the private economy, particularly the banking sector, of its own economy. The importance of emerging markets to the world economy has become immense; its share of global GDP is already 50%.

### Austria

The recovery in the euro zone, as suggested in some indices at the beginning of the year, has not yet materialised. The economy in Austria therefore was weaker than expected in the first quarter 2013; neither exports nor domestic demand provided significant impulse. In its economic forecasts, the Austrian Institute of Economic Research (WIFO) and the IHS (Institute for Advanced Studies) expect the Austrian economy to perform significantly better than the euro zone as a whole, due to its strong industrial core. In 2013, moderate growth of 0.4% (WIFO)

or 0.6% (IHS) is expected, while GDP should again be stronger in 2014. Austria is also in a relatively good position in regard to the labour market compared to the rest of Europe and will have the lowest unemployment rate in the EU for the fourth year in a row in 2013. However job growth has lost momentum and WIFO has predicted 0.7% for 2013. The rate of inflation has declined from a high at the beginning of the year and is again at 2.2% as at 30 June 2013.

### Share and bond markets

The highs and lows continued on the share markets in the second quarter and peaked in mid-May at new record levels before the exit rumours led to a weak end to the quarter. In general, investors used temporary price declines to enter markets. Several emerging market indices were disappointing in comparison to levels at the beginning of the year.

On the bond market, the possible withdrawal by the central banks led to noticeably higher yields for 10 year bonds. Bond prices eased significantly in the short term.

### Currencies

The euro weakened against the US dollar toward the end of the quarter to 1.30. However, the euro has strengthened steadily since the beginning of the year against the Japanese yen in response to the extremely relaxed Japanese monetary policy.

### Raw materials

The sell-off continued in the commodity markets. Precious metals (especially gold and silver) were severely strained at the beginning of the second quarter and industrial metals also dropped sharply. Base metals have been the best performers since the beginning of the year.

## CONSOLIDATED MANAGEMENT REPORT AS AT 30 JUNE 2013

Vorarlberger Landes- und Hypothekenbank Aktiengesellschaft (Hypo Landesbank Vorarlberg) earned income before taxes of EUR 39.0 million. This amount is lower than last year's result which included the early buyback of Tier 1 loans in the first half of 2012, but is still slightly above plan. The decrease is attributable entirely to trading income.

In view of the continuing difficult market environment, Hypo Landesbank Vorarlberg remains convincing with its sustainable business model, stable profitability and successful cost management. The Bank has always followed a conservative accounting policy and did not change its measurement principles

in the first half of the year. As planned, total assets fell slightly to EUR 14.07 billion (minus 3.0%).

Elections to the Supervisory Board were held in April. Alfred Geismayr was appointed the new Chairman of the Supervisory Board and Jodok Simma assumed the position of Deputy Chairman. The five new members of the Supervisory Board support the continuation of the successful policies of Hypo Landesbank Vorarlberg.

### Income statement

Net interest income after loan loss provisions amounted to EUR 67.2 million as at 30 June 2013, 8.4% lower than last year. However, compared to 2011, net interest income increased by 9.5% and remains the largest contributor to annual earnings. Business for the majority of our customers remains strong and sufficient provisions have been made for all identifiable risks. Loan loss provisions are slightly higher due to cautious valuation but remain at a low level in comparison to competitors.

As a result of lower commissions in securities business, net fee and commission income fell in the second quarter by 2.7% to EUR 18.4 million. The sharp decline in trading profit to EUR 4.9 million is predominately due to a non-recurring event from the previous year.

Administration expenses are 2.2% higher than last year at EUR 46.1 million. Staff costs are slightly lower at EUR 27.1 million and the number of employees (weighted by % of FTE) fell by one to 726 compared to the same period in 2012. Material expenses rose year-on-year by 4.6%. Due to the implementation of new regulations, increases in administration and IT costs are expected in the future.

Earnings before taxes as at 30 June 2013 amounted to EUR 39.0 million (2012: EUR 91.5 million), in 2011 earnings before taxes was EUR 38.8 million. After taxes, Hypo Landesbank Vorarlberg reported consolidated net income as at 30 June 2013 of EUR 29.5 million. After last year's very good results due to a non-recurring event, the Bank is again on the same level as 2011 (Group results 2011: EUR 29.7 million).

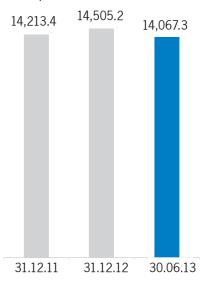

That Hypo Landesbank Vorarlberg is a healthy, successful and very efficient bank, even in challenging times, is underscored by a cost-income-ratio of 46.23%. a ROE of 10.04% and a debt/equity ratio (banking book) of 15.50%.

### Balance sheet development

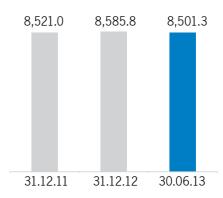

Total assets of the Group is, as planned, slightly lower than last year at EUR 14.07 billion (minus 3%). Of this, EUR 8,501.3 million is loans and advances to customers. This is a slight decrease of 1.0% compared to 2012; compared to 2011, loans

to customers fell by 0.2%. On the liabilities side, liabilities to customers fell by 0.8% to EUR 4,706.6 million as at 30 June 2013. Financial liabilities at fair value was EUR 5,460.5 as at 30 June 2013.

Development of total assets (in million EUR)

Development of loans and advances to customers (in million EUR)

### Capital resources

The paid-in capital of Hypo Landesbank Vorarlberg amounted to EUR 165,5 million. Capital resources under Sections 23 and 24 of the BWG (Austrian Banking Act) were EUR 1,176.9 million. With a debt/equity ratio (banking book) of 15.50% and a core capital ratio (banking book) of 9.79%, the Bank remains at the same level as the previous year and is on a solid foundation.

### Rating

With an A1 rating, Hypo Landesbank Vorarlberg is currently the highest rated Austrian universal bank. The rating was up-

7

6

dated by Moody's on 19 July 2013 and remains unchanged at A1. In order to guarantee an excellent rating and through that favourable refinancing, the Managing Board will pay special attention to further strengthening equity requirements in the coming years.

## **BUSINESS SEGMENTS AS AT 30 JUNE 2012**

### **Corporate Customers/Public Sector**

As the leading corporate bank in Vorarlberg, Hypo Landesbank Vorarlberg offers, in addition to traditional banking products, bank-related services such as leasing, real estate services and insurance via its subsidiaries. International services as well as expert advising and consulting services with regard to funding programmes and institutions round off its financing portfolio. The relatively stable growth in corporate customer business reflects the strong state of businesses in Austria, Southern Germany and Switzerland as do the below average risk costs in the first half of 2013. The continuing uncertainty of domestic businesses concerning further economic and political developments led to restrained investment activity in the first half of the year and thus a slight decrease in lending volume. There was satisfactory development in lending business as well as new customer growth particularly in Vienna, Styria, Upper Austria and Southern Germany. With good conditions and excellent credit-worthiness, Hypo Landesbank Vorarlberg has established itself as a strong corporate bank.

Despite lower margins, net interest income in the Corporate Sector was EUR 35.9 million in the first six months. Earnings before taxes in the Corporate Customers sector was EUR 17.9 million.

### **Private Customers**

In the Private Customer sector, Hypo Landesbank Vorarlberg distinguishes itself through the quality and competence of its consultation. In residential construction financing, in all deposit business and above all with sophisticated forms of investment. we want to use our exceptional expertise, experience, and our well-trained employees to flexibly and convincingly meet the demands of our customers.

Due to the continuing low interest rates, demand for loans to construct or renovate property remains high. With Hypo-Klimakredit (which supports energy-saving and environmentally aware construction), Hypo-Lebenswert-Kredit (to enhance living standards after retirement) and Hypo-Kredit Zinslimit (to safeguard low interest rates), Hypo Landesbank Vorarlberg offers various forms of investment and can meet the individual needs of its customers. We continue to observe a high percentage of unscheduled repayment of loans, not least due to the low

interest rates in the deposit area. To cover future real estate investments through deposits, customers should take advantage of low interest rates for financing and continue to save capital. Hypo Landesbank Vorarlberg has for many years paid special attention to the importance of regular monthly savings.

Due to the low interest rates, conservative short-term deposits are in demand. Customers are also cautious in the securities area, and the demand for alternative forms of investment, such as real estate or gold, remains high. Beginning in April 2013, customers have found interesting savings alternatives online. At hypodirekt.at, savers can deposit money easily from home, payable on demand and with attractive conditions. Hypo Landesbank Vorarlberg is well positioned with hypodirekt.at and plans to introduce new, attractive services soon.

Strong competition among banks in the deposit business has put tremendous pressure on margins and net interest income in the Private Customers segment declined slightly. As at 30 June 2013, earnings before taxes was EUR 2.2 million.

### **Private Banking and Asset Management**

To meet the elevated security needs of investors, Hypo Landesbank Vorarlberg's asset management has developed new products with value protection concepts. In-house asset management strategies assure that we are able to meet the great demand of our customers. Hypo IO Maximum Return Strategie (Hypo IQ), introduced in 2011, recorded a very positive performance in the six months of 2013 (+8.01%) and volume doubled from EUR 13 million to EUR 28 million. The mathematical investment concept Hypo IQ is able to benefit from upward and downward trends on the stock markets. There was also further development in the Hypo Realwertestrategie. The new Hypo Value Momentum Strategie continues to invest in twenty attractive shares, whose intrinsic value is assessed higher than the current share price reflects. This value concept is then supplemented by ten further shares which are characterised by particularly strong momentum.

For most investors, in view of the current low interest rate environment, the major question is the correct investment mix. To answer this question, asset management has developed its own optimisation algorithms which our consultants use to assist customers in assessing possible portfolios. Portfolio combinations with up to 15 different asset classes are analysed. At the customer's request, asset management can ensure that the investment mix is always flexibly adapted to the current market opportunities. More than 100 optimisation proposals were made to customers in the first half of the year, the majority leading to new asset management mandates.

Due to the continued uncertain macroeconomic environment, the willingness to invest by private and business customers remained persistently low in the first six months. This is reflected in a decrease in number of mandates and assets under management. As at 30 June 2013, assets under management was EUR 707.7 million, the number of mandates was 2,589.

## International performance standards in asset management

PricewaterhouseCoopers reviews the compliance of asset management with the Global Investment Performance Standards (GIPS®) on an annual basis and accredited us most recently in December 2012. Since 2005, Hypo Landesbank Vorarlberg is the first and remains the only Austrian bank whose asset management is certified according to these internationally recognised standards.

### Award for private banking

In recent years, Hypo Landesbank Vorarlberg has earned an excellent reputation in the sectors Private Banking and Asset Management. The Elite Report has also named Hypo Landesbank Vorarlberg as one of the best private banks in Austria for the past several years. In 2013, for the second year in a row, Hypo Landesbank Vorarlberg was valued "summa cum laude", which is the highest category for distinguished banks on the Elite pyramid.

## Financial Markets/Treasury

In April 2013, the rating agency Moody's gave the Hypo Landesbank Vorarlberg mortgage cover fund the highest rating, which is Aaa. After a road show, the Bank successfully issued the mortgage bond with a volume of EUR 600 million. By the end of June, a total of 18 new issues with a volume of EUR 751 million were emitted.

Hypo Landesbank Vorarlberg continues to have a strong liquidity situation although short-term liquidity fell by EUR 550 million to minus EUR 85 million through the redemption of bonds in the first quarter of 2013. Outflows at this level were expected and were compensated by the planned placement of a mortgage bond. The second quarter was marked by high liquidity inflows. As at 30 June 2013, the available short-term liquidity was EUR 700 million.

Foreign exchange and interest derivative trading improved in the second quarter compared to the beginning of the year. Generated income increased significantly with 1,058 customer transactions traded.

The volume under management, for which Hypo Landesbank Vorarlberg functions as custodian bank, was EUR 6,800 million. Net fee and commission income for the Group fund service is lower year-on-year due to a slight fall in volume and through lower trading commissions.

During the reporting period, the nominal volume managed by the swap group increased by EUR 500 million to again over EUR 10 billion. In collateral management there was daily collateral movement due to the volatile market conditions. The total cash and securities collateral portfolio amounted to EUR 166.8 million as at 30 June 2013. EUR 12,9 million lower than in the first quarter of 2013.

Earnings from the business sectors Financial Markets/Treasury was EUR 6,4 million as at 30 June 2013. Further growth in 2013 will depend on developments in the financial markets and the sovereign debt crisis. Other important determinations will continue to be the effects from AIFMG / FATCA and EMIR.

### **Leasing and Real Estate**

The contribution to earnings of the Corporate Center was EUR 12.6 million as at 30 June 2013 (2012: EUR 10,4 million). Corporate Center includes the areas of leasing and real estate.

In 2012, the entire Austrian leasing and real estate business of Hypo Landesbank Vorarlberg was combined in the Hypo Immobilien & Leasing GmbH to enable the Bank to exploit administrative synergies and particularly synergies relating to real estate leasing. The company's range of services extends from real estate brokerage through property appraisal, construction management, property management and facility management to optimal financing solutions involving vehicle, movables and real estate leasing. Customers can profit from an experienced, mobile team of experts offering comprehensive leasing advisory services and real estate management in close cooperation with the Bank. The focus for Hypo Vorarlberg Leasing AG, headquartered in Bolzano, Italy, is on real estate and municipal leasing. Based on ratings by customers, the Vorarlberg real estate portal laendleimmo.at chose a "realtor of the month" for the first time in February 2013. Hypo Immobilien & Leasing GmbH earned points with its great commitment and expert advice and was elected the winner by the website users. In order to achieve a uniform corporate identity, the logo and corporate profile of Hypo Immobilien & Leasing GmbH was reworked in keeping with the Hypo Landesbank Vorarlberg corporate design.

### OUTLOOK

European economic policy faces major challenges. While the economic recovery in the USA, as well as in Japan, parts of Southeast Asia, South America and Africa continues, economic growth in Europe, especially in the euro zone, remains weak. In its economic forecasts, the Austrian Institute of Economic Research (WIFO) expects the Austrian economy to perform significantly better than the euro zone as a whole. According to WIFO, the Austrian GDP will grow by 0.4% in 2013. Next year, as

a strong export economy, Austria should benefit from a revival of world trade and, against a background of increased trading activity, growth will accelerate to 1.6%.

### Focus areas for 2013

In general, the new Managing Board will adhere to Hypo Landesbank Vorarlberg's proven business model and continue to concentrate on private and corporate customer business. Despite numerous political and economic uncertainties, the first half of the year went according to plan and the Managing Board is cautiously optimistic for 2013.

"Strategy Project 2018" was introduced in 2012 in conjunction with the changes in the Managing Board. In view of the Bank's business model and high productivity, when developing the new strategy, attention was focussed on additional growth and profit opportunities. The strategic guidelines of the project are increasing equity through further strengthening internal financial resources and securing the best possible cost-optimal liquidity. Other guidelines include expanding earnings in customer business, in Vorarlberg by even greater exploitation of business opportunities with existing customers (cross-selling), or by acquiring new customers in markets outside of Vorarlberg. Customer recommendation remains a high priority with us.

As the leading corporate bank in Vorarlberg, Hypo Landesbank Vorarlberg will continue to be a responsible financial partner for the companies in our market area. Corporate investment has declined in recent months, therefore a lower demand for loans is expected in 2013.

In the private customer segment, the liquidity and refinancing policies will continue to focus on obtaining new deposits. Hypo Landesbank Vorarlberg enjoys a high level of confidence from investment clients due to its good creditworthiness and great reliability. To meet customers' needs for security and flexibility, the Bank will continue to offer attractive conditions for deposits. Wealth management (business involving high net-worth individuals, companies and institutions) will be expanded in Vorarlberg and Vienna. Due to the high priority given to creating living space and renovation in private financing, a strong level of investment can be expected.

Hypo Landesbank Vorarlberg is a consultant and advisory bank and will continue to offer our customers "Passionate. Sound. Advice." At the same time we are required to be a modern bank that keeps up with the times. To offer our customers a little more technological comfort, they can now deposit money from home at attractive interest rates with hypodirekt.at. Through absolute transparency and clear parameters in determining interest rates, customers are informed about developments in interest rates and bonus development at an early stage. Hypo Landesbank Vorarlberg is now well-positioned throughout

Austria with this new technology. In order to participate fully in the growing internet banking market, new products are in development. In asset management we want to attract new customers from the classic institutional investors such as banking, insurance and pension groups. Our "assets" include an innovative product range and knowledgeable, individual advice and support.

Based on the new strategy, Hypo Landesbank Vorarlberg is on plan for the first six months of 2013. However, in view of known global economic and foreign political conflicts, heightened vigilance is necessary.

### Expected earnings development in 2013

Interest business will remain a stable pillar for earnings development in 2013. Hypo Landesbank Vorarlberg will continue to follow a careful risk and accounting policy. After very conservative risk assessment, loan loss provisions have been adjusted appropriately. In general, the Managing Board expects satisfactory results, although lower than in 2012 due to the non-recurring event of last year. The Managing Board expects a stabilisation of net fee and commission income at the current level. Operating expenses will rise moderately in comparison to the previous year. Staff costs should remain constant, however, among administration expenses in particular higher IT expenses are expected. Hypo Landesbank Vorarlberg has always paid special attention to a sustainable liquidity policy and has sufficient funds to allow further expansion of its lending volume.

In general, the Managing Board must assume a sharp increase in additional costs for the Bank due to the implementation of Basel III and BIRG, securities capital gains tax and bank excise tax, which will lead to price increases in banking services. Hypo Landesbank Vorarlberg paid over EUR 43 million in taxes in 2012, including bank excise tax of EUR 7,5 million. In view of the required strengthening of capital in the banking sector as well as the unequal application of the bank excise tax, the Managing Board would view further increases in the tax very critically.

The centralised portfolio management of Vorarlberger Landes- und Hypothekenbank Aktiengesellschaft having registered offices in Bregenz qualifies as a firm within the meaning of the Global Investment Performance Standards (GIPS®). The firm comprises all asset management mandates of private and institutional customers as well as public funds that are managed in the context of the bank's centralised investment process. It does not include decentralised organisational units and other units of the group that operate independently. The firm is in compliance with the GIPS®. For a list of all composites along with a detailed description, please contact Vorarlberger Landes- und Hypothekenbank Aktiengesellschaft at: +43 (0)50 414-1281 or e-mail us at gips@hypovbg.at.

### F. FINANCIAL RISKS AND RISK MANAGEMENT

The full disclosure on the organisational structure, risk management and the risk capital situation (per Section 26 Austrian Banking Act and the Disclosure Implementation Regulation – Off-VO) are posted on the internet at www.hypovbg.at

### (17) OVERALL RISK MANAGEMENT

The Bank's operations involve the following risks:

- Credit risk: This includes the counterparty default risk, as well as the risk of deteriorating credit standing. Risks may also result from the use of credit risk mitigation methods.
- Market risks: The common characteristic of these risks is that they result from price changes in money and capital markets. Market price risks are categorised as interest rate, spread change, stock price, foreign currency or commodity risks.
- Liquidity risk: Liquidity risks can be broken down into maturity and retrieval risks, structural liquidity risk (rollover financing risk), and market liquidity risk. Maturity risk is an unplanned extension of maturities in the lending business. Retrieval risk is the risk that credit commitments are unexpectedly utilised or deposits withdrawn. As a result, a bank may no longer be able to fully meet its payment obligations. Structural liquidity risk arises from the possibility that the required roll-over financing may only be available at less favourable conditions, or not at all. Market liquidity risk is in evidence when positions can only be sold immediately by taking a loss.
- Operational risk: This includes the risk of direct or indirect losses caused by human error, process deficits, technological failure, or external influence. Operational risks also include legal risk.

Other risks: These include above all those types of risks for which only rudimentary or no quantification methods exist. Specifically, strategic, reputation, equity, performance and business risks may be classified as other risks.

The Bank manages these risks in order to limit the overall bank risk. The Managing Board is responsible for the risk management of Hypo Landesbank Vorarlberg. Accordingly, it approves the principles of risk control and the risk measurement procedures. Additionally, it establishes the Bank's willingness to take risks and defines limits for all relevant types of risk based on the bank's risk-absorbing capacity.

The Bank reviews the effects of economic and market developments on the income statement and net assets on an ongoing basis.

The overall risk management of Hypo Landesbank Vorarlberg is based on a strict separation between Front Office and Back Office. The risk management functions of Hypo Landesbank Vorarlberg are bundled under the responsibility of the Managing Board member responsible for risk management. Risk controlling at Hypo Landesbank Vorarlberg is developed and implemented by Group Risk Controlling. This unit measures credit, market, liquidity and operational risks on a group level. The independent assessment and approval of credit applications is carried out by the Credit Management departments for corporate and private customers.

The Bank's risk situation and the Capital Adequacy Process are addressed by the Asset & Liability Management Committee (ALM). In this committee, the Managing Board decides on market risk measurement procedures, defines interfaces between Sales and Treasury with regard to the market interest rate method, and the level of market risk and liquidity limits. Group Risk Controlling, Controlling, and Treasury departments are also present at committee meetings.

The strategies, procedures, and approaches adopted for the management of risks are documented in writing. The Bank maintains a risk management manual and a credit manual, which are available to all employees. These manuals are updated on a regular basis. Additionally, the Bank has outlined all relevant work processes in written procedures that are likewise available to all employees.

Non-performing loans rose slightly in the second quarter from EUR 249 million to EUR 255 million. There is currently low volatility on the capital markets. The risk-bearing capacity remained at all times within the limits set by the Managing Board. Maturities of our own bonds in the first quarter were already refinanced on a long-term basis.

The value at risk (VaR) for individual risk types compared to the previous year is shown below:

VaR (99 % / 10 days) Interest rate risk (Mean value)

in '000 EUR	2013	2012
January	3,414	9,885
February	3,128	9,597
March	2,687	8,794
April	4,476	9,015
May	3,767	9,893
June	2,359	10,682

### VaR (99 % / 10 days) Foreign currency risk (Mean value)

in '000 EUR	2013	2012
January	940	790
February	1,058	781
March	1,190	1,064
April	1,291	1,315
May	1,156	1,479
June	1,636	1,332

### VaR (99 % / 10 days) Equity risk (Mean value)

in '000 EUR	2013	2012
January	214	286
February	216	222
March	222	214
April	202	220
May	227	204
June	265	227

## VaR (99 % / 10 days) Creditspread risk (Mean value)

in '000 EUR	2013	2012
January	3,788	15,332
February	3,587	14,200
March	3,162	12,779
April	3,014	12,317
May	2,669	13,104
June	2,534	13,068

### VaR (99 % / 10 days) Marketrisk (Mean value)

in '000 EUR	2013	2012
January	5,072	12,964
February	5,263	12,527
March	4,389	11,309
April	4,999	10,631
May	4,181	10,811
June	3,992	10,495

## (18) CONSOLIDATED CAPITAL AND REGULATORY CAPITAL REQUIREMENTS

### Capital requirements per Section 22 Austrian Banking Act

in '000 EUR	30.06.2013	31.12.2012
Assessment basis per Section 22 Austrian Banking Act	7,593,950	7,582,549
Capital resource requirement for solvency	607,516	606,604
Capital requirement for settlement risk	0	0
Capital requirement for position risks	0	0
Capital resource requirement for operational risk	33,256	31,573
Total capital resource requirements	640,772	638,177

### G. DISCLOSURES PERTAINING TO AUSTRIAN LAW

### (19) AUSTRIAN LAW

In line with Section 59a Austrian Banking Act in conjunction with Section 245a (1) Austrian Corporate Code (UGB), the consolidated financial statements were prepared in accordance with International Financial Reporting Standards applicable in the EU. In line with Section 59a Austrian Banking Act, the disclosures per Section 64 (1) no. 1 – 15 and (2) Austrian Banking Act and Section 245a (1) and (3) UGB are to be incorporated in the Notes to the consolidated financial statements.

# DECLARATION OF THE STATUTORY REPRESENTATIVES WITH RESPECT TO THE INTERIM REPORT PER SECTION 87 (1) NO. 3 AUSTRIAN STOCK EXCHANGE ACT (BÖRSEG)

We confirm that to the best of our knowledge the condensed consolidated interim financial statements prepared in accordance with applicable accounting standards (IAS 34) provide a true and fair view of the Group's assets and liabilities, financial condition, and results of operation, and that the Group quarterly management report provides a true and fair view of the Group's assets and liabilities, financial condition, and results of operation in relation to key events in the first nine months of the fiscal year and the significance thereof with respect to both the condensed consolidated interim financial statements and to material risks and contingencies accruing in the remaining three months of the fiscal year.

This interim report was not subjected to an audit or reviewed by an auditor.

Bregenz, 1 August 2013
