^{*} In October 2017, Standard & Poor's (S&P) announced their rating for Hypo Vorarlberg: "A" for non-current liabilities and "A-1" for current liabilities, with a stable outlook. The Bank is currently rated "Baa1" by Moody's, also with a stable outlook. This makes Hypo Vorarlberg one of the best-rated banks in Austria

GROUP MANAGEMENT REPORT IN ACCORDANCE WITH IFRS AS AT 30 SEPTEMBER 2017

BANKING ENVIRONMENT

Global economy and euro zone

The global purchasing manager indices in the manufacturing sector currently presents a robust picture of the world economy. The expected US economic performance for the third quarter of 2017 was surprisingly positive despite the turbulent hurricane season. After two increases in interest rates in the first half of 2017, the US Federal Reserve (Fed) left interest rates unchanged in the third quarter, but prepared financial markets for the possibility of a further increase by the end of the year.

Good sentiment continued in the European economic area as well. In the third quarter, momentum increased slightly, also positively impacting the labour market. Inflation picked up as well, but remained below the target of the European Central Bank (ECB) of almost 2%. Despite this positive development, at the meeting of the international central banks in Jackson Hole ECB president Mario Draghi remained silent, with regard to an imminent exit from the expansionary monetary policy, not least because of the strength of the Euro. As a result, yields on bond markets dropped sharply. The hesitation of the ECB also unsettled stock market investors for many weeks. This trend was in sharp contrast to the pronounced economic optimism. For example, ifo business climate index reached a new all-time high.

On the other hand, lower liquidity in the summer and increased investor caution resulting from diplomatic dissonance between North Korea and the US tended to impact negatively. Since September, which many shareholders recall as a terrible month, stock markets recovered. It was then that institutional buyers used the depressed prices levels to buy up stocks with good dividends. Investors generated good returns investing in the domestic stock market, in emerging countries as well as in European small and mid caps.

Austria

According to the latest flash estimate by the Austrian Institute of Economic Research (WIFO), Austria's economy grew by 0.8% quarter-on-quarter in the third quarter of 2017, after 0.8% in the penultimate three months. GDP growth was driven primarily by strong consumer demand, expanded corporate investments and exports. Industrial activity gathered pace, value creation in goods manufacturing recorded the highest increase since 2010. In the third quarter, inflation inched upwards. In September 2017, inflation in Austria averaged 2.4% for the year.

Commodities and currencies

The evident recovery of the economy led to an increased demand even on the commodities market. Especially industrial metals gained strongly as did crude oil prices. The price of

North Sea Brent even posted a two-year high in September 2017. With increasing geopolitical risks, gold was rediscovered as a safe haven. The accented weakness of the dollar was a factor in a considerable increase in the gold price. Towards the end of the third quarter, together with burgeoning fantasy on interest rate hikes, this segment saw profit taking. The upward trajectory of the euro continued into the third quarter, while the US dollar and Swiss franc declined again. Compared with the beginning of 2017 the US dollar was priced approximately 10% weaker against the euro, while the Swiss franc depreciated by around 6%.

BUSINESS PERFORMANCE

Income statement

As at 30 September 2017, Hypo Vorarlberg Bank AG generated earnings before taxes of TEUR 58,430 (30 September 2016: TEUR 91,393).

The operating result before changes in the Bank's own credit risk was TEUR 61,715 in the third quarter of 2017, considerably below the result in the same period the previous year (30 September 2016: TEUR 126,210). The previous year's result was positively influenced by significant reversals of valuation allowances, particularly in connection with the HETA solution, while the key negative factor on the 2017 result was from equity consolidation.

While the high level of liquidity reflects full confidence among customers, the ECB's policy of negative interest rates had an impact on Hypo Vorarlberg's net interest income. Net interest income of TEUR 120,312 was generated as of 30 September 2017 (30 September 2016: TEUR 124,637). At the same period of the previous year, provisions were reversed resulting in a positive figure of TEUR 3,379 for loan loss provisions (30 September 2016: TEUR 41,560). Net interest income after loan loss provisions decreased from TEUR 166,197 in the previous year to TEUR 123,691 (-25.6%). The Bank recognised sufficient provisions for all identifiable risks.

Hypo Vorarlberg's net fee and commission income developed positively in the first nine months of 2017. Net fee and commission income amounted to TEUR 25,977 as at 30 September 2017, thus increasing by 3.0% (2016: TEUR 25,223). The net trading results (without changes in the Bank's own risk) decreased from TEUR 18,062 to TEUR 10,187, which is primarily attributable to measurement effects.

The headcount of 717 employees (full time equivalents) has remained essentially the same as last year (-0.1%), while staff costs decreased slightly from TEUR 45,728 to TEUR 45,364. Material expenses came to TEUR 26,950, up 8.0% on the level of the same quarter in the previous year (TEUR 24,958), this was primarily caused by higher IT costs. Total administrative expenses as at 30 September 2017 amounted to TEUR 76,300, a 2.2% rise year on year (30 September 2016: TEUR 74,653).

Net result from equity consolidation totalled TEUR –17,908 in the first three quarters of 2017 (30 September 2016: TEUR 2,464). The negative net result is attributable to a write-down of the investment in HYPO EQUITY Unternehmensbeteiligungen AG in the first quarter. Reasons behind this write-down were the stalled exit process and the associated liquidity requirement of a portfolio company, in which HUBAG holds an interest. In the third quarter of 2017, Hypo Vorarlberg acquired a further stake in HUBAG and now holds 79.19% of the voting rights.

Adjusted for taxes, Hypo Vorarlberg reported consolidated net income of TEUR 41,363 as at 30 September 2017 (30 September 2016: TEUR 70,064).

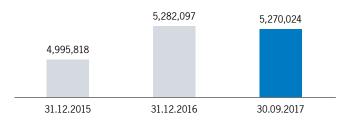

The Cost-Income Ratio (CIR) of 57.34% and the total capital ratio according to CRR of 16.15% underline the fact that Hypo Vorarlberg is a healthy, successful and efficient bank.

Balance sheet development

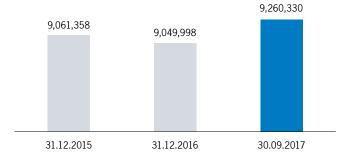

Total consolidated assets decreased 1.4% to TEUR 13,138,266 in the third quarter of 2017 (31 December 2016: TEUR 13,324,387). Of this amount, TEUR 9,260,330 is attributable to loans and advances to customers, up 2.3% on 31 December 2016. Liabilities to customers declined slightly by 0.2% from TEUR 5,282,097 to TEUR 5,270,024.

Financial liabilities designated at fair value declined by 52.7% to TEUR 1,336,772 as at 30 September 2017 (31 December 2016: TEUR 2,826,384). It relates predominantly to high volume repayments with the state guarantee being discontinued.

Development of liabilities to customers (in '000 EUR)

Development of loans and advances to customers (in '000 EUR)

Own funds

The paid-in capital of Hypo Vorarlberg amounted to TEUR 165,453. Own funds totalled TEUR 1,214,019 as at 30 September 2017 (31 December 2016: TEUR 1,246,529). The total capital ratio is 16.15% (31 December 2016: 16.52%). With a Tier 1 capital (T1) ratio of 13.39% (31 December 2016: 13.33%) and a Common Equity Tier 1 (CET 1) ratio of 13.26% (31 December 2016: 13.21%), Hypo Vorarlberg already fulfils the highest level of the Basel III standards applicable since 1 January 2014. These figures are comfortable in light of the risk profile. The Managing Board continues to pay particular attention to strengthening the Bank's capital adequacy in order to ensure an excellent credit rating and hence favourable refinancing conditions for the future.

Panama Papers

Following the publication of the "Panama Papers" in early April 2016, with which Hypo Vorarlberg was also linked, the FMA examined the Bank's offshore business as part of a special investigation. After a commission of enquiry called for by the Vorarlberg SPÖ political party was curtailed due to a lack of significant findings, a final report was issued and supplemented by minority reports from individual parties in early 2017.

In recent years, Hypo Vorarlberg has been gradually reducing the number of accounts for non-operative offshore companies. The low level of income attributable to these business relationships means that this change will not have a material impact on the Bank's earnings strength. Following on from the debate concerning the Panama Papers, the Managing Board adjusted its strategy and business activities with offshore clients together with the shareholders of the Bank.

Rating of Hypo Vorarlberg

Since October 2015, Standard & Poor's (S&P) has rated Hypo Vorarlberg as "A-" for non-current liabilities and "A-2" for current liabilities (outlook: stable). In October 2017, due to higher capitalisation among other matters, the Bank improved its S&P rating by one notch: "A" for non-current liabilities and "A-1" for current liabilities with positive outlook. The Bank is currently rated "Baa1" by Moody's, with a stable outlook. This makes Hypo Vorarlberg one of the best-rated financial institutes in Austria.

As the first bank in Vorarlberg, Hypo Vorarlberg has also received an outstanding rating in the sustainability sector. Oekom research AG, one of the leading rating agencies in the sustainable investment sector, has awarded the Bank with the "C" rating in oekom Corporate Rating from May 2017 and therefore ranked in the Prime sector. With this result, market-traded securities of Hypo Vorarlberg qualify as environmentally and socially ethical investments.

DEVELOPMENT BY SEGMENT

Corporate Customers/Public Sector

The Corporate Customer business at Hypo Vorarlberg developed stably in the third quarter of 2017. Despite conservative measurement in the lending business, risk costs are low and point to the excellent condition of companies in the Bank's market areas.

In the second quarter, Hypo Vorarlberg brought a pioneering innovation onto the market: "Hypo Office Banking" (HOB). It is thus the first Austrian bank to provide an international, multibank online payment transaction application. HOB enables companies to manage all their national and international accounts in one web-based system.

In the first three quarters of 2017, Hypo Vorarlberg achieved a pleasing earnings and volume performance across all markets in the Corporate Customers segment. Net interest income as at 30 September 2017 amounted to TEUR 68,662, up 2.8% compared to the previous year (2016: TEUR 66,881). Net fee and commission income increased to TEUR 9,564, up significantly in comparison to the end of September 2016 (TEUR 8,935). Loan loss provisions remained at a low level. As in the previous year, Hypo Vorarlberg reported a positive figure in the third quarter. Overall, the Corporate Customers segment generated earnings before taxes of TEUR 54,305 as at 30 September 2017 (2016: TEUR 52,839), an upturn of 2.8%.

Private Customers

In its Private Company business, Hypo Vorarlberg offers its customers top quality advisory services. Personal customer relationships continue to be the focus – especially in residential construction financing and demanding investments.

Due to low interest rates, long-term financing for the creation of housing is in high demand in the Private Customers segment. Both the number of financing arrangements and the average financing amounts are steadily rising. The demand for long-term interest rate fixing is also high. Borrowers are able to fix interest rates for up to 15 years. At the same time, customer requirements are becoming increasingly individual. The Bank is responding to this with innovative solutions such as the Hypo-Lebenswert-Kredit or the Hypo-Lebenszeit-Kredit. Energy-saving investments are supported with the Hypo-Klimakredit. In the area of financing, the level of unscheduled repayments remains high. In line with a decision of the Austrian Supreme Court on dealing with negative interest rates, Hypo Vorarlberg refunded its customers overpaid interest.

While borrowers are benefiting from low interest rates, investors are being driven to find alternatives to the usual forms of investment. To achieve a return above the rate of inflation, investors

with a medium and long-term horizon also have to consider more risky investment forms. Hypo Vorarlberg is meeting customer demand for returns and security with its own innovative asset management products.

Due to the advancement of digitalisation and changing customer requirements, the Bank is also continuously expanding its digital service range. The aim is to connect existing branches with the digital world in a way that enables customers to benefit from optimum interaction between technology and people. We remain confident that personal consulting will remain indispensable in future – especially for high-volume financing or extensive investments.

Despite substantial challenges – low and negative interest rates, extensive regulations and the trend towards digitisation – Hypo Vorarlberg achieved solid net fee and commission income in the Private Customers segment of TEUR 13,294 as at 30 September 2017 (2016: TEUR 13,071). Net interest income amounted to TEUR 22,432, thus significantly decreasing year-on-year (2016: TEUR 26,761) because margin on deposits declined again as a result of negative interest rates.

Administrative and other expenses are very high, due to the high project and investment costs. These include investments in digital development and payments to the deposit protection fund and the single resolution fund. Overall, the Private Customers segment generated earnings before taxes of TEUR 1,861 in the period under review (2016: TEUR 6,232).

Private Banking and Asset Management

In Private Banking and Wealth Management, Hypo Vorarlberg attaches importance to long standing and trusting relationships with its customers. As sparring partners for the customers, advisors listen to them and take time in order to gain the trust and understanding required for long-term and robust investment concepts. Excellent service, high-quality advice and attentiveness when handling customer assets result in valuable recommendations.

Demand for asset management strategies and investment products is growing because of the economically and politically challenging environment. The regular adjustment of the portfolio via the specially designed "Hypo Vermögensoptimierung", which is an asset optimisation process, gives both private and corporate investors the security of investing in line with the market environment. A large number of asset classes allows for flexible investing and for target returns to be achieved on a risk-optimised basis. The assets managed by Asset Management amounted to TEUR 848,327 in total as at 30 September 2017. A total of 2,914 mandates were managed.

On this basis, the Bank will continue expanding Wealth Management, which is the top segment of its investment business.

International performance standards in Asset Management

The auditing company PricewaterhouseCoopers Zürich reviews the compliance of our Asset Management based on the Global Investment Performance Standards (GIPS) ® on a regular basis. The last review as at year-end 2016 was carried out in spring 2017. Since 2005, Hypo Vorarlberg has been the first and is still the only Austrian bank whose Asset Management is certified according to these international standards.

Financial Markets/Treasury

Financial Markets again achieved a very pleasing performance in the third quarter of 2017. Ongoing narrowing of credit spreads combined with high investor demand for fixed income investment opportunities offered issuers almost ideal conditions to participate on the capital market with new issues. In September, Hypo Vorarlberg again took advantage of the opportunity to tap the capital market with a public EUR transaction. This concluded refinancing planning in the public sector for 2017, at the same time partially refinancing the high level of maturities resulting from the maturing issues with a state deficiency guarantee.

In the third quarter, Hypo Vorarlberg carried out ten new issues with a total volume of around TEUR 905,000. These included seven private placements, one retail issue and a senior unsecured green bond with a volume of TEUR 300,000. With the successful placement of its green bond, Hypo Vorarlberg is a trailblazer among the Austrian banks, having taken the opportunity of combining sustainable aspects of the business with targeted investor demand. In addition, the security is the first green bond of an Austrian bank to be listed on the Vienna Stock Exchange. Energy-efficient homes and commercial properties in Vorarlberg are financed or refinanced with proceeds from the bond issue.

A net volume of approximately TEUR 143,700 was invested in bonds by ALM/Investment in the reporting period. The weighted remaining term of these new investments is 4.3 years. The volume of nostro bonds totalled TEUR 2,679,000 as at the end of September 2017.

In the third quarter of 2017, Hypo Vorarlberg's readily available short-term liquidity declined as scheduled by more than EUR 1 billion to what remained a positive value. Over the past few months, extensive arrangements were made for higher liquidity requirements in the reporting quarter as a result of the expiry of numerous issues with a state deficiency guarantee. These measures were effective as evidenced by the LCR ratio, which at all times is well over the 100% mark which is the legal requirement as of 2018.

Securities sales in the branches amounted to around TEUR 269,300 in the third quarter of 2017, equivalent to a year-on-year upturn of approximately TEUR 84,500 or 45.7%. This TEUR 269,300 trading volume corresponds roughly to the average of the past few years. Investment interest continues to focus more on shares, certificates and warrants. Interest in bond investments remains low.

The volume under management in Fund Service amounted to TEUR 7,057,000 (–0.47%) in the third quarter of 2017. Two public funds were merged due to cost reasons, one public fund is still in liquidation.

As at 30 September 2017, Hypo Vorarlberg managed a total of 1,031 swaps, interest rate options and currency options with a nominal volume of around TEUR 9,200,000. In the third quarter of 2017, cash collateral of partner banks changed from TEUR 34,400 to TEUR 65,400 due to market value changes.

Overall, the first three quarters of 2017 were very positive for the Financial Markets division and projects such as green bond and preparations for synthetic securitisation were implemented as planned. Financial Markets generated a result before taxes of TEUR –2,274 as at 30 September 2017. As in the previous year, the negative figure is attributable primarily to remeasurement effects. The further development will largely depend on events on the financial markets.

Corporate Center/Leasing and Real Estate

In addition to the Bank's core business segments, the Corporate Centre item includes the property and leasing business, insurance services and strategic investments.

Hypo Vorarlberg's entire Austrian and Swiss leasing and real estate business is bundled in Dornbirn-based Hypo Immobilien & Leasing GmbH. Additional locations are Bregenz, Bludenz, Feldkirch and Vienna. The company's range of real estate services extends from real estate brokerage through property appraisal, construction management and property management to facility management. It offers optimal financing solutions involving vehicle, movables and real estate leasing for private customers and SMEs. In the area of leasing, sales activities via bank employees in Eastern Austria were supplemented by the launch of direct sales throughout Austria.

The area of property appraisal is being expanded further in Vienna. Since the end of 2015, the Vienna team of Hypo Immobilien & Leasing GmbH has been based in the Zacherlhaus building together with the Bank. The team in Vienna is now supported by a dedicated real estate broker.

Hypo Vorarlberg Leasing AG is a subsidiary of Hypo Vorarlberg. The company has its head office in Bolzano and has branch offices in Como and Treviso. Hypo Vorarlberg Leasing

develops leasing solutions, particularly in the real estate, renewable energy and municipality sectors. It offers its products and services on the Northern Italian market.

The Corporate Centre reported earnings before taxes of TEUR 4,538 (2016: TEUR 40,470) as at 30 September 2017. The decline in earnings is attributable to a partial write-down of the investment in HYPO EQUITY Unternehmensbeteiligungen AG (HUBAG) in the first quarter of 2017. In connection with the injection of liquidity, Hypo Vorarlberg acquired a majority share in the company. Closing took place in the third quarter. On the basis of purchasing shares, the Bank increased its holding in HUBAG from 43.28% to 79.19%.

OUTLOOK

Economic environment

According to WIFO, Austria's GDP grew by 0.8% year-on-year in the third quarter of 2017. Growth is broad-based and gaining momentum from both Austria and abroad. The Austrian Economic Chamber (WKO) anticipates GDP growth totalling 2.8% as a whole in 2017. According to the Austrian Economic Chamber's estimates (consumer price index calculated on a national basis), inflation is expected to amount to 1.9% in 2017, meaning that gross income per capita is stagnating in real terms.

Focus areas for 2017/2018

Although the economic and legal environment is forcing a realignment throughout the entire banking industry, the Managing Board will continue to pursue Hypo Vorarlberg's established, broad-based business model. New regulations require banks to build up additional equity and secure a cost-optimal liquidity supply, while costs are rising steadily.

Low and negative interest rates and new technological challenges for banks and their services are also bringing about changes. To ensure the profitability of Hypo Vorarlberg in the long term, growth markets outside our home market of Vorarlberg are to be increased.

A project has been implemented in cooperation with a consulting agency in order to strengthen the brand's profile. As a result of this project, the Bank has been operating under a shortened brand name (Hypo Vorarlberg) and a new company name (Hypo Vorarlberg Bank AG) since 2 October 2017. Subsequently, the new brand profile will be implemented comprehensively at the Bank and its subsidiaries.

In its corporate customer business, the Bank will continue to supply its business customers – medium sized and large companies in Austria, Southern Germany and Eastern Switzerland – with financing. However, the Managing Board expects to see weaker demand for credit in the fourth quarter of 2017 than in previous years. Low risk costs are anticipated on account of the solid economic situation of companies in the Bank's market areas. Customer proximity and high-quality consulting form the basis for all business relationships; at the same time, the digital service range is being further expanded.

As a result of its consulting-intensive services, Hypo Vorarlberg also stands out in the Private Customers segment. Its customers benefit from individual solutions in residential construction financing and for securities transactions including Asset Management. The Bank is still expecting high demand in the financing sector, especially for the creation of housing.

In Private Banking and Asset Management, Hypo Vorarlberg has developed an excellent reputation for itself in recent years. Building on this, the Wealth Management division will be advanced further, including installing an advisory desk as of 1 January 2018. In its investment business, the Bank's primary objective is to conserve its customers' wealth in real terms.

Digitalisation and changing customer behaviour require not only new products, but also new business models. For this reason, Hypo Vorarlberg has set itself the aim of connecting the existing branches with new technology in a way that enables customers to benefit from optimum interaction. Personal consulting will remain indispensable in the future – especially in the areas of major financing and extensive investments. For this reason, consulting expertise and training will be key issues in 2017 and beyond. The Bank remains clearly committed to its branches as an important sales channel. In order to focus on customers and the highest possible level of service – and also as a sign of esteem towards its customers – the Bank offers flexible appointments outside regular business hours.

The online service range is being expanded on an ongoing basis. The new online banking system which launched in autumn 2016 is regularly updated with new functions and customers have been able to buy products online since summer 2017.

Expected earnings development in 2017

Hypo Vorarlberg continues to pursue cautious risk and accounting policies and will make corresponding additions to loan loss provisions.

The Managing Board has always paid particular attention to a sustainable liquidity policy. The Bank thus holds extensive liquidity reserves to allow the lending volume to further expand organically, meaning that a broad stabilisation of net interest income can be expected, albeit on a lower level than in the last few years. The Managing Board expects net fee and commission income to stabilise in 2017. Interest-related business will remain a stable pillar of the Bank's earnings development in 2017, but is expected to decline on account of the low/negative interest rate policy.

In September 2017, the majority of the Vorarlberg state guarantees for certain liabilities of the Bank expired. Thus, at the end of the third quarter, higher volumes were due for repayment. To refinance these maturities, the Bank had already carried out prefunding in recent years and bought back outstanding issues prematurely from the market. The remaining volume is being replaced in the course of new issuing activity and refinancing via the ECB (TLTRO).

In 2017, operating expenses will rise moderately overall and staff costs are also expected to increase slightly. In 2017, the Bank also had made investments to further expand its digital service range in addition to implementing a new brand profile at all locations, resulting in higher costs. The costs for the deposit protection fund and the single resolution fund are still high. Furthermore, the implementation of new regulations, such as MiFiD II, also has high costs. As a result of the amendment of the bank levy and the high-one off payment in 2016, the bank levy for 2017 is significantly lower again (approximately TEUR 2,500).

Overall, the performance in the first three quarters of 2017 was satisfactory. The Managing Board is confident of achieving the anticipated earnings, which will nevertheless be much lower than the previous year's. The known economic and domestic political events require increased vigilance.

DISCLAIMER: The centralised portfolio management of Vorarlberger Landesund Hypothekenbank Aktiengesellschaft having registered offices in Bregenz qualifies as a firm within the meaning of the Global Investment Performance Standards (GIPS®). F. FINANCIAL RISKS AND RISK MANAGEMENT

The full disclosure on the organisational structure, risk management and the risk capital situation according to CRR are posted on the internet at www.hypovbg.at.

(19) OVERALL RISK MANAGEMENT

The Bank's operations involve the following risks:

- Credit risk: This includes the counterparty default risk, as well as the risk of deteriorating credit standing. Risks may also result from the use of credit risk mitigation methods and currency or concentration risks in lending business.
- Market risks: The common characteristic of these risks is that they result from price changes in money and capital markets. Market price risks are categorised as interest rate, spread change, stock price, foreign currency or commodity risks
- Liquidity risk: Liquidity risks can be broken down into maturity and retrieval risks, structural liquidity risk (rollover financing risk) and market liquidity risk. Maturity risk is an unplanned extension of maturities in the lending business. Retrieval risk is the risk that credit commitments are unexpectedly utilised or deposits withdrawn. As a result, a bank may no longer be able to fully meet its payment obligations. Structural liquidity risk arises from the possibility that the required roll-over financing may only be available at less favourable conditions, or not at all. Market liquidity risk is in evidence when positions can only be sold immediately by taking a loss.
- Operational risk: This includes the risk of direct or indirect losses caused by human error, process deficits, technological failure, or external influence. Operational risks also include legal risk.
- Shareholder risk: This covers items including private equity, mezzanine financing, subordinated financing and investments in funds with these components. This also includes subordinated banking securities.
- Real estate risk: This refers to the risk of fluctuations in the value of property owned by the Group. This especially includes properties which serve as collateral (including leased assets) and cannot be sold promptly to third parties as part of realisation ("foreclosed assets"). This does not include owner-occupied properties.
- Macroeconomic risk: This refers to loss potentials resulting from exposure to macroeconomic risk factors.
- Risk of excessive indebtedness: That means the risk of a low capital ratio.
- Money laundering and financing of terrorism: The Bank continues to counter this risk by all countermeasures provided.
- Model risks: This is the risk of significant underestimation of the capital backing for major risks in the risk-bearing capacity statement due to false input parameters, false premises, false models or incorrect application of these models.

Other risks: These include above all those types of risks for which only rudimentary or no quantification methods exist. Specifically, strategic, reputation, equity, performance and business risks may be classified as other risks.

The Bank manages these risks in order to limit the overall bank risk. The Managing Board is responsible for the risk management of Hypo Landesbank Vorarlberg. Accordingly, it approves the principles of risk control and the risk measurement procedures. Additionally, it establishes the Bank's willingness to take risks and defines limits for all relevant types of risk based on the bank's risk-absorbing capacity.

The Bank reviews the effects of economic and market developments on the income statement and net assets on an ongoing basis.

The overall risk management of Hypo Vorarlberg is based on a strict separation between Front Office and Back Office. The risk management functions of Hypo Landesbank Vorarlberg are bundled under the responsibility of the Managing Board member responsible for risk management. Risk controlling at Hypo Vorarlberg is developed and implemented by group risk controlling. This unit measures the risks on a group level. The independent assessment and approval of credit applications is carried out by the credit management departments for corporate and private customers.

The Bank's risk situation and the Capital Adequacy Process are addressed by the Asset & Liability Management Committee (ALM). In this committee, the Managing Board decides on market risk measurement procedures, defines interfaces between Sales and Treasury with regard to the market interest rate method, and the level of market risk and liquidity limits. Group risk controlling, controlling, and treasury departments are also present at committee meetings.

The strategies, procedures and approaches adopted for the management of risks are documented in writing. The Bank maintains a risk management manual and a credit manual, which are available to all employees. These manuals are updated on a regular basis. Additionally, the Bank has outlined all relevant work processes in written procedures that are likewise available to all employees.

Non-performing loans correspond to the regulatory asset class of loans in arrears. In the third quarter of 2017, non-performing loans increased slightly from TEUR 293,527 to TEUR 302,390.

Maturity transformation is at a moderate level. The Bank's risk-bearing capacity was guaranteed at all times within the limits set by the Managing Board. In the third quarter, there were significant repayments on the Bank's own bonds. As the required liquidity had already been procured on a long-term basis, there were no specific incidents.

The value at risk (VaR) for general market risk compared to the VaR (99 % / 10 days) overall market risk (mean) previous year developed as follows:

G. DISCLOSURES PERTAINING TO AUSTRIAN LAW

(21) AUSTRIAN LAW

In line with Section 59a Austrian Banking Act in conjunction with Section 245a (1) Austrian Corporate Code (UGB), the consolidated financial statements were prepared in accordance with International Financial Reporting Standards applicable in the EU. In line with Section 59a Austrian Banking Act, the disclosures per Section 64 (1) no. 1-15 and (2) Austrian Banking Act and Section 245a (1) and (3) UGB are to be incorporated in the Notes to the consolidated financial statements.

DECLARATION OF THE STATUORY REPRESENTATIVES WITH RESPECT TO THE INTERIM REPORT PER SECTION 87 (1) NO. 3 AUSTRIAN STOCK EXCHANGE ACT (BÖRSEG)

We confirm that to the best of our knowledge the condensed consolidated interim financial statements prepared in accordance with applicable accounting standards (IAS 34) provide a true and fair view of the Group's assets and liabilities, financial condition, and results of operation, and that the Group quarterly management report provides a true and fair view of the Group's assets and liabilities, financial condition, and results of operation in relation to key events in the first nine months of the fiscal year and the significance thereof with respect to both the condensed consolidated interim financial statements and to material risks and contingencies accruing in the remaining three months of the fiscal year.

This interim report was not subjected to an audit or reviewed by an auditor.
